COMMUNITY ANALYTICS REPORT

10X's Community Insights

Comprehensive analysis of engagement, content, members, and growth across the 10X Circle LMS platform.

Platform: community.10x.in **Community ID:** 323931 **Created:** March 25, 2025 **Visibility:** Public

Report Date: February 24, 2026

OVERVIEW

Executive Summary

10X's Community is an AI and automation learning platform hosting 315 members with a robust curriculum of 117 lessons across 5+ sprints and 94 past live events. While the content infrastructure is strong, the community faces a significant **engagement crisis**: 63.5% of members have never posted or commented, per-post engagement averages just 0.19 likes, and 74% of members have zero gamification points. Content creation is heavily admin-driven, with "10x Support" authoring nearly half of recent posts. The community has **no upcoming events scheduled**, and 52% of its 27 spaces sit empty. Immediate action is needed to activate the silent majority, diversify content creation, and revitalize the event pipeline.

ANALYSIS

Key Strengths

STRENGTH

Robust Curriculum

117 lessons across 5+ structured sprints covering AI automation fundamentals through full-stack deployment projects. A serious learning pathway.

STRENGTH

Consistent Event Cadence

94 events hosted since launch, split between weekly live classes (61) and masterclass events (33). Demonstrates operational commitment.

STRENGTH

Growing Member Base

315 members with 100% active account status. The platform is attracting and retaining registered users consistently since March 2025.

STRENGTH

Global Diversity

Members span the US (63), UK (52), Canada (13), India (9), UAE, Sri Lanka, and more. A truly international learning community.

STRENGTH

Experienced Members

53% of members bring 5+ years of professional experience. This high-caliber audience can contribute deeply when activated.

STRENGTH

Clear Learning Goals

96% of members have defined their learning objectives. 52% are upskilling, 21% are starting businesses, and 20% seek career changes.

ANALYSIS

Critical Concerns

CRITICAL

Engagement Crisis

Only 18.4% of members ever posted and 26.7% ever commented. 63.5% (approximately 200 members) are completely silent. The community lacks organic interaction.

CRITICAL

Admin-Heavy Content

"10x Support" authored 46 of the most recent 100 posts. The community is admin-driven rather than member-driven, creating a broadcast dynamic.

CRITICAL

Near-Zero Per-Post Engagement

Average 0.19 likes and 0.53 comments per post. Content is being created but members are not interacting. Posts go largely unnoticed.

CRITICAL

Gamification Failure

74% of members have 0 gamification points. The points system exists but is not driving any behavioral change or participation incentives.

CRITICAL

No Upcoming Events

All 94 events are in the past with zero upcoming events scheduled. To outside observers, the community may appear dormant or abandoned.

CRITICAL

Empty Spaces Problem

14 of 27 spaces (52%) have zero posts. The community is over-structured with many unused spaces, diluting member attention and creating ghost-town impressions.

INFRASTRUCTURE

Spaces & Events

Spaces Overview

27 total spaces across 5 types

Basic (Discussion)	Course	Event	Chat	Other
10	7	5	4	1

14 of 27 Spaces Are Empty (52%)

Over half of all spaces have zero posts. Many are course or chat spaces that were created but never activated. This fragments member attention and creates a ghost-town impression.

Events Summary

94 total events, all completed

0 Upcoming Events Scheduled

The event pipeline is completely empty. All 94 events are in the past. New visitors see no upcoming activity, giving the impression the community may be inactive.

Host: All events hosted by "10x Support" (single admin account)

CURRICULUM

Course Structure

117 lessons organized into structured sprints, progressing from AI fundamentals to full-stack project deployment.

SPRINT 1

Days 1 - 14

AI Automation fundamentals. Introduction to tools, concepts, and foundational skills.

SPRINT 2

Days 15 - 28

Webhooks, workflow design, debugging techniques, and integration patterns.

SPRINT 3

Days 29 - 42

LLMs, prompt engineering, MCP protocols, and browser automation.

SPRINT 4

Days 43 - 56

Vector databases, RAG systems, embeddings, and production deployment.

SPRINT 5

Days 57 - 70

Resume screener project, full-stack applications, and capstone projects.

SPRINT 6+

Additional Sprints

Extended curriculum with advanced topics and specialized modules.

GAMIFICATION

ACTION PLAN

Recommendations

ACTION

Launch Weekly Engagement Challenges

Create themed weekly challenges (e.g., "Share your AI automation win") with gamification point rewards. This gives silent members a low-friction reason to participate.

ACTION

Consolidate Empty Spaces

Archive or merge the 14 empty spaces into active ones. A focused set of 10-12 spaces will concentrate activity, making each space feel alive and active.

ACTION

Member Spotlight Program

Feature one community member weekly with their learning journey and project. This shifts the content dynamic from admin-broadcast to community-driven storytelling.

ACTION

Schedule Upcoming Events Immediately

The event pipeline is empty. Schedule at least 4-6 weeks of upcoming events to signal active community life. Visibility of future events drives retention and return visits.

ACTION

Onboarding Automation for Silent Members

Implement automated nudges for the 63.5% who have never engaged: welcome DMs, "introduce yourself" prompts, first-post incentives, and 7-day drip sequences.

ACTION

Revamp Gamification System

Tie points to meaningful actions: posting (10 pts), commenting (5 pts), completing a sprint (50 pts), attending live events (15 pts). Add visible badges and milestone rewards.

ACTION

Introduce "Post of the Week" Feature

Highlight the best community post each week with a pinned announcement and bonus gamification points. This incentivizes quality contributions, gives recognition to active members, and provides social proof that the community values member-generated content over admin broadcasts. Consider adding a voting mechanism to increase comment engagement.

This report was generated using community data aggregated from Circle platform APIs. All metrics reflect data as of the report generation date.
